Standard Template for Extended Abstract Submitted to LEAF 2026

First Author[1], Second Author[2*], and Third Author[1]

[1]Replace this text with author's affiliation (use full address)
*The superscript * indicates the corresponding author's email address, which is the supervisor of the project*
[2]Example in writing your affiliation; Department of Physics, FMIPA Universitas Indonesia, Kampus UI Depok, Depok 16424, Indonesia

**Corresponding author: authoremail@abcde.com*

ABSTRACT

Please prepare your extended abstract using standard **A4 paper size (210 mm × 297 mm)** with the following margins: **25 mm** for the top, left, and right margins, and **30 mm** for the bottom margin. Use **Times New Roman**, **font size 11**, **justified alignment**, and **single line spacing** throughout the document. The abstract must be written in **clear and concise English**, summarizing the **purpose**, **methodology**, **key results**, and **main conclusions** of the research in approximately **150–250** words.

Avoid the use of citations and undefined abbreviations. Authors are also encouraged to include **figures and tables** where relevant, ensuring they are properly labeled and referenced in the text. Please use the table feature (Insert → Table) in your word processor to place figures or tables, rather than inserting them as floating objects, to maintain proper formatting within the document. Example of references formatting can be seen in the references part. Please submit your abstract in PDF format.

Insert your figures or tables here

Labeled your figures or tables here.

Keywords : You can write up to five keywords,
